

## ABRAHAM'S STARS      Veras/Maniscalco

A                                  G                                  D  
Sons and Daughters, Daughters and Sons  
G                                  Em                                  A                                  D  
Who are the stars? We are the ones!  
A                                  G                                  D  
Born to be chosen, Sent to proclaim  
G                                  D                                  A                                  D  
That God really loves us and calls us by name 2x

D                                  G                                  A                                  D  
Stars of the screen have money and fame  
G                                  A                                  F#                                  D  
And glittering lights to spell out their name  
D                                  G                                  A                                  D  
But Abraham's stars shine more confidently  
G                                  Em                                  A                                  D  
God's love is the true love that really loves me

### *Refrain*

Stars of the field might win the big game  
With trophies and medals and cups to their name  
But Abraham's stars gain a glimmering treasure  
Old trophies get dusty, God's love lasts forever

### *Refrain*

Stars of the band rap fast and rock loud  
With loads of big hits and lots of big crowds  
But Abraham's stars make a more joyful song  
God always goes with us, and He sings along

### *Refrain*
